ELSEVIER

Journal of Non-Crystalline Solids 172–174 (1994) xi–xxi

JOURNAL OF NON-CRYSTALLINE SOLIDS

Contents

Preface vii
International scientific advisory and program committees ix
Contents Parts I and II xi

PART I

Section 1. Glass transition and related topics

Metastability, mode coupling and the glass transition
Mazenko, G.F. and J. Yeo 1

α-relaxation spectra in supercooled liquids
Sjögren, L. and W. Götze 7

Mesoscopic relaxation near glass transition singularities
Götze, W. and L. Sjögren 16

Structural relaxation dynamics in supercooled liquids
Cummins, H.Z., G. Li, W.M. Du and J. Hernandez 26

Depolarized light scattering studies of the boson peak and the transversal phonons in a glass-forming liquid: OTP
Steffen, W., B. Zimmer, A. Patkowski, G. Meier and E.W. Fischer 37

Light-scattering study of β-relaxation in $CaKNO_3$ and salol near the liquid–glass transition: idealized and extended mode coupling theory analysis
Li, G., M. Fuchs, W.M. Du, A. Latz, N.J. Tao, J. Hernandez, W. Götze and H.Z. Cummins 43

Mode-coupling and phenomenological analysis of the depolarized light scattering spectra of ortho-terphenyl
Patkowski, A., W. Steffen, G. Meier and E.W. Fischer 52

Some consequences of the α/β bifurcation of relaxations in supercooled liquids
Zeng, X.C., D. Kivelson and G. Tarjus 61

Rotational dynamics in *ortho*-terphenyl: a microscopic view
Laurent, J.L. and G. Wahnström 69

Molecular dynamics simulation study of short time dynamics in polymer liquid and glass
Roe, R.J. 77

The glass transition of colloidal polystyrene micronetwork spheres – a dynamic light scattering study
Bartsch, E., V. Frenz and H. Sillescu 88

Microscopic theory of the Kohlrausch relaxation constant β_K
Phillips, J.C. 98

Models of cooperative dynamics near the glass transition
Jäckle, J. 104

0022-3093/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

An analytical approach of the ergodic–non-ergodic transition in correlated systems
Souletie, J. 108

Indications for a change of transport mechanism in supercooled liquids and the dynamics close and below T_g
Rössler, E., U. Warschewske, P. Eiermann, A.P. Sokolov and D. Quitmann 113

The dynamics of the $\bar{\alpha}$- and β-relaxations in glass-forming polymers studied by quasielastic neutron scattering and dielectric spectroscopy
Colmenero, J., A. Arbe and A. Alegría 126

The dynamics of strong and fragile glass formers: vibrational and relaxation contributions
Sokolov, A.P., A. Kisliuk, D. Quitmann, A. Kudlik and E. Rössler 138

The boson peak in glass formers of increasing fragility
Hassan, A.K., L. Börjesson and L.M. Torell 154

Reorientational motion of the NO_3^- ion through the liquid–glass transition in $Ca_{0.4}K_{0.6}(NO_3)_{1.4}$ and $Ca(NO_3)_2 + 8H_2O$
Jacobsson, P., L. Börjesson, A.K. Hassan and L.M. Torell 161

Relaxational dynamics in molecular glass formers
Bermejo, F.J., E. Enciso, M. García-Hernandez, J.L. Martínez, B. Fåk and T. Mason 167

Time-resolved measurements of scaling behavior in $LiCl/H_2O$ near the liquid–glass transition
Halalay, J.C., Y. Yang and K.A. Nelson 175

The recoverable compliance of amorphous materials
Plazek, D.J., C.A. Bero and I.-C. Chay 181

Thermal response in the splitting region of the dynamic glass transition
Garwe, F., M. Beiner, E. Hempel, J. Schawe, K. Schröter, A. Schönhals and E. Donth 191

A dynamical model of supercooled liquids
Dattagupta, S. 197

Ultrasonic measurements on a fragile glass-forming liquid close to the glass transition
Cutroni, M., P. Migliardo, A. Piccolo and C. Alba-Simionesco 201

Glass transition relaxations in 2D polymer melts – a Monte Carlo simulation study
Ray, P. and K. Binder 204

Homogeneous dispersion of dielectric responses in a simple glass
Richert, R. 209

Molecular motions near the glass transition range and the fragility of glass-forming systems
David, L., A. Sekkat and S. Etienne 214

Time study of the dielectric permittivity of supercooled 3-bromopentane during crystallization
Breslin, M., R. Boyd and J.G. Berberian 218

Static viscosity of supercooled 3-bromopentane in mixtures with 3-methylpentane
Baranek, M., M. Breslin and J.G. Berberian 223

Q-dependence of the relaxation times of the α-relaxation as observed by quasielastic neutron scattering
Colmenero, J., A. Arbe, A. Alegría and K.L. Ngai 229

Completely non-polar solvation as a probe of mechanical relaxation in glass-forming liquids
Fourkas, J.T., A. Benigno and M. Berg 234

The Kohlrausch law as a limit solution to mode coupling equations
Fuchs, M. 241

Translational and rotational molecular motion in supercooled liquids studied by NMR and forced Rayleigh scattering
Chang, I., F. Fujara, B. Geil, G. Heuberger, T. Mangel and H. Sillescu 248

Cooperative motion in fragile liquids near the glass transition: probe reorientation in o-terphenyl and polystyrene
Blackburn, F.R., M.T. Cicerone, G. Hietpas, P.A. Wagner and M.D. Ediger 256

Density-mediated transport and the glass transition: high pressure viscosity measurements in the diamond anvil cell
Herbst, C.A., R.L. Cook and H.E. King Jr. 265

The fast relaxation process near the glass transition in amorphous polymers with different microstructure
Frick, B., D. Richter, R. Zorn and L.J. Fetters 272

Retardation of rotational reorientation dynamics in polymers near the glass transition: a novel study over eleven decades in time using second-order non-linear optics
Dhinojwala, A., J.C. Hooker and J.M. Torkelson 286

Results from an unbiased analysis of nearly 1000 sets of relaxation data
Havriliak Jr., S. and S.J. Havriliak 297

Dynamic heterogeneity near the glass transition
Patterson, G.D. and J.R. Stevens 311

Non-Debye and non-Arrhenius primary response of liquids, glasses, polymers and crystals
Chamberlin, R.V. and D.W. Kingsbury 318

Low energy excitation and fast motion near T_g in amorphous polymers
Kanaya, T., T. Kawaguchi and K. Kaji 327

The scaling of the dielectric α-relaxation in low molecular glass-forming systems and polymers
Schönhals, A. and F. Kremer 336

Cooperative conformational relaxation
Matsuoka, S. 344

Influence of surface interaction on the reorientational dynamics of pentylcyanobiphenyl confined in a porous glass
Schwalb, G., F.W. Deeg and C. Bräuchle 348

Coupling between the structure and self-diffusion in the supercooled liquid dynamics regime
Dzugutov, M. 353

Comparative measurements of the electrical and shear mechanical response functions in some supercooled liquids
Christensen, T. and N.B. Olsen 357

Quasistatic measurements of the frequency-dependent bulk and shear modulus of supercooled liquids
Christensen, T. and N.B. Olsen 362

Dielectric relaxation of isotactic polystyrene and defect diffusion model
Fukao, K. and Y. Miyamoto 365

Dynamical glassy behaviour on the basis of simple models described by master equations
Brey, J.J., A. Prados and M.J. Ruiz-Montero 371

Lithium borate glasses: a quantitative study of strength and fragility
Chryssikos, G.D., J.A. Duffy, J.M. Hutchinson, M.D. Ingram, E.I. Kamitsos and A.J. Pappin 378

Monte Carlo simulation of the glass transition in two- and three-dimensional polymer melts
Lobe, B., J. Baschnagel and K. Binder 384

Anharmonic effects in undercooled liquids
Buchenau, U. 391

A random-walk model of relaxations in supercooled melts
Arkhipov, V.I. and H. Bässler 396

A ^{1}H NMR study of glycerol at high pressure
Marzke, R.F., D.P. Raffaelle, K.E. Halvorson and G.H. Wolf 401

Renormalizing time in critical phenomena
Galam, S. and A. Mauger 408

Phenomenological analogies between non-equlibrium and correlated systems
Tringides, M.C. and K.L. Ngai 412

Viscous liquids and glass transitions
Discussion session – Angell, C.A., K. Binder, J. Colmenero, H.Z. Cummins, E.W. Fischer, D. Richter and H. Sillescu 420

Section 2. Orientational glasses, spin glasses and Coulomb glasses

Proton and deuteron glasses: 1D and 2D NMR and NQR
Blinc, R., J. Dolinšek, B. Zalar and F. Milia 436
Relaxation effects in the Coulomb glass
Ruiz, J., E. Cuevas, M. Ortuño, J. Talamantes, M. Mochena and M. Pollak 445
Relaxation in quantum spin glasses
Tadić, B., R. Pirc, R. Blinc and S. Dattagupta 449
Steric hindrance and percolation in orientational glasses
Galam, S. 453
Numerical study of relaxation effects in the Coulomb glass
Schreiber, M. and K. Tenelsen 457
NMR relaxation in Y–Ba–Cu–O superconductors
Brinkmann, D. 461
Dielectric relaxation dynamics in C_{60} and C_{70}
Mondal, P., P. Lunkenheimer, R. Böhmer, A. Loidl, F. Gugenberger, P. Adelmann and C. Meingast 468
Dynamics of pristine and doped polyacetylene: a combined inelastic neutron scattering and computer simulation analysis
Dianoux, A.J., J.L. Sauvajol, G.R. Kneller and J.C. Smith 472
Light scattering in orientational glasses
Westerhoff, T., F. Bruchhäuser, R. Feile and R. Boehler 481
Static magnetic response of the three-state Potts glass
Vollmayr, K., G. Schreider, J.D. Reger and K. Binder 488
Relaxation of dc magnetization in Gd_2CuO_4
Mira, J., J. Castro, J. Mahia, C. Vazquez-Vazquez, M.A. Lopez-Quintela, J. Rivas and S.B. Oseroff 491
Relaxation dynamics in systems of magnetic particles
Rubi, J.M., A. Pérez-Madrid and M.C. Miguel 495
Dynamics of frustrated cellular automata
Tadić, B. 501
Monte Carlo simulation of a quasi one-dimensional spin glass
Orešič, M. and R. Pirc 506
Slow non-equilibrium process in a glassy crystal
Descamps, M. and J.F. Willart 510
Relaxations near the glass transition of a molecular crystal
Bée, M., P. Derollez and M. Descamps 520
Secondary relaxations and the constant density of states in quadrupolar glasses
Solf, M.P. and M.W. Klein 531
Polarization relaxation in disordered ferroelectrics
Toulouse, J., R. Pattnaik and L.A. Knauss 538

Section 3. Non-equilibrium dynamics near T_g

Structural relaxation in thermorheologically complex materials
Ducroux, J.-P., S.M. Rekhson and F.L. Merat 541
Dielectrics and thermodynamics of a macromolecule's growth
Cassettari, M., G. Salvetti, E. Tombari, S. Veronesi and G.P. Johari 554

Creep and physical aging of PVC: dependence on stress and temperature
Read, B.E., G.D. Dean and P.E. Tomlins 562
Dielectric behavior of n-butyl acrylate during polymerization reaction
Carlini, C., A. Livi, P.A. Rolla and D. Fioretto 569
Physical aging phenomena in an amorphous polymer at temperatures far below the glass transition
Muzeau, E., G. Vigier and R. Vassoille 575
Physical aging kinetics in vitreous Se-based alloys
Saiter, J.M., A. Hamou and C. Vautier 580
The appearance of annealing pre-peaks in inorganic glasses: new experimental results and theoretical interpretation
Pappin, A.J., J.M. Hutchinson and M.D. Ingram 584
Physical aging and enthalpy relaxation in polypropylene
Hutchinson, J.M. and U. Kriesten 592
An extended review of structural relaxation models with the mutual correlation of their parameters
Illeková, E. and Ch. Cunat 597
Non-exponentiality of the enthalpy relaxation under constant-temperature conditions in the time domain in supercooled liquids and glasses
Fujimori, H. and M. Oguni 601
Remarkable non-exponentiality of the enthalpy relaxation in fast ion conducting glass $(AgI)_{0.5}$ $(AgPO_3)_{0.5}$ far from equilibrium
Hanaya, M., M. Nakayama and M. Oguni 608
Physical aging of epoxy networks after quenching and/or plastic cycling
Aboulfaraj, M., C. G'Sell, D. Mangelinck and G.B. McKenna 615
Physical aging of amorphous linear polyesters
Cortés, P. and S. Montserrat 622
Non-linearity and non-exponentiality of primary relaxations
Böhmer, R. 628
Dilatometric measurement of structural relaxation in $Ge_{38}S_{62}$ glass
Málek, J. and R. Švejka 635
T_g displacements: Indicator of plasticization and antiplasticization effects on poly(ethylene terephtalate)
Saiter, J.M., D. Langevin, P. Lebaudy and J. Grenet 640
The activation energy spectrum for the enthalpy relaxation of a glassy liquid crystalline polymer: memory effects
Lorenzo, V., J.M. Pereña, E. Pérez, R. Benavente and A. Bello 644
Structure and topology of silica aerogels during densification
Schaefer, D.W., B.J. Olivier, C. Ashley, G. Beaucage, D. Richter, B. Farago, B. Frick and D.A. Fischer . . 647
Influence of a carboxyl-terminated modifier (CTBN) on the cure of an epoxy resin
Morancho, J.M. and J.M. Salla 656

Author index Parts I and II xxiii
Subject index Parts I and II xxxv

PART II

Contents Parts I and II vii

Section 4. Dynamics of polymers and complex fluids

Dielectric study of subchain dynamics and dimension: butadiene–isoprene block copolymers

Adachi, K., H. Hirano and T. Kotaka 661
Investigating miscible polymer blend dynamics with optical and mechanical rheometry
Fuller, G.G., J.A. Zawada and R.H. Colby 668
New perspectives of NMR in ultrahigh static magnetic field gradients
Chang, I., F. Fujara, B. Geil, G. Hinze, H. Sillescu and A. Tölle 674
Computer modelling of the polymer glass transition
Paul, W. 682
Nuclear spin–lattice relaxation and theories of polymer dynamics
Kimmich, R., N. Fatkullin, H.W. Weber and S. Stapf 689
Viscoelastic properties of blends of miscible polymers and their diblock copolymers
Roovers, J. and F. Wang 698
Relaxation of polar orientational order in non-linear optical polymers by second harmonic generation
Wang, C.H., H.W. Guan and S.H. Gu 705
Diffusion in glassy polymers– relaxation and antiplasticization
Duda, J.L., I.H. Romdhane and R.P. Danner 715
Static and dynamical structure of confined polymer films
Hu, H.-W., S. Granick and K.S. Schweizer 721
Change of microscopic friction in concentrated polystyrene solutions
Floudas, G. 729
The T_g regulation effect in hydrophilic polymers
Rault, J., Z.H. Ping and T. Nguyen 733
Multidimensional ^{2}H NMR studies of the non-exponential chain relaxation of polystyrene above the glass transition
Leisen, J., K. Schmidt-Rohr and H.W. Spiess 737
A dispersion step in the ultrasonic region of a nematic liquid single crystal elastomer
Diercksen, K., F.W. Deeg and C. Bräuchle 751
Dilatometric evidence for the apparent decoupling of glassy structure from the mechanical stress field
McKenna, G.B. 756
Variation of dynamic viscoelasticity during yielding and post-yield relaxation in a glassy polymer
Yoshioka, S., H. Usada and Y. Nanzai 765
Highly cooperative relaxation in glassy styrene–acrylonitrile copolymer induced by large deformation
Nanzai, Y. and N. Nakayama 771
Volume changes during flow of solid polymers
Delin, M., R.W. Rychwalski, J. Kubát, M.J. Kubát, H. Bertilsson and C. Klason 779
Solvent reorientation in block copolymer solutions
Rizos, A.K., K.L. Ngai, S. Pispas and N. Hadjichristidis 786
Local and global motions in concentrated solutions of poly(methyl methacrylate)/bis(2-ethylhexyl phthalate)
Rizos, A.K., G. Floudas and W. Brown 790
Brownian dynamics of polymer chains in external fields of different symmetry
Darinskii, A., A. Lyulin and I. Neelov 794
Structural studies of complex systems using small-angle scattering: a unified Guinier/power-law approach
Beaucage, C. and D.W. Schaefer 797
Positronium lifetime in an ellipsoidal free-volume hole of polymers
Jean, Y.C. and H. Shi 806
Translational dynamics in binary homopolymer mixtures
Green, P.F. 815
Simulation of deformation and fracture of polymer chains in flowing solutions
López Cascales, J.J. and J. García de la Torre 823

Photon correlation study of structural relaxations in $NaCF_3SO_3$ containing polymer electrolytes
Bergman, R., L. Börjesson, G. Fytas and L.M. Torell 830
Dynamic birefringence of amorphous polymers
Osaki, K., T. Inoue, E.-J. Hwang, H. Okamoto and O. Takiguchi 838
The relaxation of the polymer networks with interchain friction
Gotlib, Y. and G. Golovachev 850
Model theories of the interaction between structural and local orientational relaxation process in polymeric systems
Gotlib, Y. 855
Shear melting of solid-like boundary layers in thin liquid films
Hersht, I. and Y Rabin 857
Dynamics of cross-linked polymers
Lapp, A., M. Daoud, G. Jannink and B. Farago 862
Constraint dynamics and chemical structure
Roland, C.M. and K.L. Ngai 868
Stochastic continuum simulations of structural relaxations in solids
Bulatov, V.V. and A.S. Argon 876
Study of cooperative relaxation modes in complex systems by thermally stimulated current spectroscopy
Lacabanne, C., A. Lamure, G. Teyssedre, A. Bernes and M. Mourgues 884
Concentration fluctuations and dynamic heterogeneity in PIP/PVE blends
McGrath, K.J. and C.M. Roland 891
Miscibility in poly(vinylethylene)/poly (isoprene) blends
McGrath, K.J., J.B. Miller and C.M. Roland 897
A new way of interpreting thermally stimulated depolarization currents of polymers using the coupling model in a broad temperature range
Marchal, E. 902
Relaxations in polymers derived from bisphenol-A
Díaz Calleja, R., D. Radić and L. Gargallo 907
Viscoelastic properties of polyelectrolyte solutions. III. Dynamic moduli from terminal to plateau regions
Takahashi, Y., H. Hase, M. Yamaguchi and I. Noda 911
Collective chain motions and the glass transition in thermotropic liquid crystal polymers. A transverse deuteron spin relaxation study
Heaton, N., D. Reimer and G. Kothe 917
Random phase approximation for compressible polymer blends
Hammouda, B. 927
Kinetics of polymer chains in elongational flow
Darinskii, A.A. and M.G. Saphiannikova 932
Structure and viscoelastic behaviour of polyurethane networks from triisocyanate and polyols with different structures
Ilavsky, M., H.W. Ulmer, K. te Nijenhuis and W.J. Mijs 935
Microscopic transport properties in liquid crystalline polymeric matrices: dependence on the thermal history
Andreozzi, L., M.P. Fontana, F. Francia, M. Giordana, D. Leporini and M. Rateo 943
Dielectric and mechanical behaviour of a copper (II) metallomesogenic homopolymer
Puértolas, J.A., L. Oriol and R. Díaz Calleja 950
Influence of conformational microstructure in the molecular motions of poly(vinyl chloride)
Elicegui, A., J.J. del Val, J. Colmenero, G. Martinez and J. Millán 955
Miscibility and dielectric α-relaxation of PECH/PVME polymer blends
Alegría, A., I. Tellería and J. Colmenero 961

Dielectric relaxation around the nematic–isotropic transition of liquid crystalline polymers
Alegria, A., J.M. Echave, F.J. Davis, W. Guo and G.R. Mitchell 966
Gelation and micellization of acqueous solutions of a triblock copolymer
Jørgensen, E.B., J.H. Jensen and S. Hvidt 972
Study of molecular mobility at the secondary relaxations range in polyamide 66 and polyamide 66/EPR blends by thermally stimulated creep and current
Demont, P., M. Diffalah, J.J. M-Vega and C. Lacabanne 978
Relaxation behaviour of semirigid chains in the amorphous state
Díaz Calleja, R., E. Saiz, E. Riande, L. Gargallo and D. Radić 985
Secondary relaxations in amorphous cellulose
Montes, J., J.Y. Cavaillé and K. Mazeau 990
Stretched exponential relaxation behavior of off-lattice polymer chains
Kranbuehl, D.E. and P.H. Verdier 996
Study of dielectric response of PMR-15 resin during cure
Stéphan, F., G. Seytre, G. Boiteux and J. Ulanski 1001
Microdielectric analysis of the polymerization of an epoxy–amine system
Mathieu, C., G. Boiteux, G. Seytre, R. Villain and P. Dublineau 1012
Structural relaxation in fully cured epoxy resins
Montserrat, S., P. Cortés, A.J. Pappin, K.H. Quah and J.M. Hutchinson 1017
Neutron spin echo investigations on the segmental dynamics in semidilute polymer solutions under Θ- and good solvent conditions
Ewen, B., D. Richter, B. Farago and B. Stühn 1023
Temperature dependence of the molecular dynamics in amorphous polymers through the rubber–glass transition
Perez, J. and J.Y. Cavaillé 1028
Distribution of activation energies for secondary relaxations in polymers
Díaz Calleja, R. and E. Riande García 1037
Dielectric relaxation spectroscopy in PHEA hydrogels
Kyritsis, A., P. Pissis, J.L. Gómez Ribelles and M. Monleón Pradas 1041
Study of Couette flow in polymer–based liquids via 1-D NMR imaging
Wang, Y. and E.D. von Meerwall 1047
Compatibility of binary and ternary blends from their thermal and dielectric properties. A comparative study
Linares, A. and J.L. Acosta 1053
Analytical and fractal descriptions of non-linear mechanical behaviour of polymers
Hellinckx, S., N. Heymans and J.-C. Bauwens 1058
Dielectric relaxations in drawn semi-crystalline poly(ethylene terephthalate)
Dargent, E., J.J. Santais, J.M. Saiter, J. Bayard and J. Grenet 1062
Swelling studies on pervaporation by dynamic-mechanical spectroscopy
Bueso F. Moscoso, L. A.Ribes-Greus and I. Alcaina-Miranda 1066
Dynamic mechanical relaxations in annealed and irradiated polyethylenes
Sáenz de Juano-Arbona, V., A. Ribes-Greus, R. Díaz Calleja, I. Alcaina-Miranda, P. Del Hierro-Navarro, C. Sanz-Box and J. Trijueque-Monge 1072
Dynamic light scattering from diblock copolymer solutions
Anastasiadis, S.H., T. Jian and G. Fytas 1078
Dielectric and mechanical relaxation in PMPS, BMC and their mixtures
Santangelo, P.G., C.M. Roland, K.L. Ngai, A.K. Rizos and H. Katerinopoulos 1084
Structure and dynamics of polymeric micelles in solution
Chu, B., Z. Zhou and G. Wu 1094

Investigation of molecular motion and interprotein interactions in solutions by TDDS: a comparison with NMR data
Ermolina, I., V. Fedotov, Y. Feldman and I. Ivoylov 1103

Time domain dielectric study of non-ionic microemulsions
Feldman, Y., N. Kozlovich, I. Nir, A. Aserin, S. Ezrahi and N. Garti 1109

Structure of water in pure liquid and biosystem
Mashimo, S. 1117

Rotational correlation times in irradiated DNA
Kalfas, C.A., E.G. Sideris, G.K. Loukakis and A. Anagnostopoulou-Konsta 1121

Dynamic properties of copolyetherureas
Marcos, A., A. Rodríguez, L. González 1125

Study of the structural relaxation of polyacrylates by Brillouin light spectroscopy
Fioretto, D., L. Palmieri, G. Socino and L. Verdini 1130

Light scattering studies of the electrorheological transition
Martin, J.E. and J. Odinek 1135

Light scattering investigation of phase separation in a micelle system
Wilcoxon, J.P., J.E. Martin and J. Odinek 1142

Dynamic scattering and phase separation in viscoelastic two-component fluids
Onuki, A. 1151

The occurrence of self-similar relaxation in polymers
Winter, H.H. 1158

Relaxation mechanisms in worm-like micelles
Marques, C.M., M.S. Turner and M.E. Cates 1168

Interfacial conformation and composition of $C_{12}E_6$ micelle in water inferred by dielectric spectroscopy
Briganti, G. and A. Bonincontro 1173

Section 5. Ionics

Conductivity and nuclear spin relaxation in superionic glasses, polymer electrolytes and the new polymer-in-salt electrolyte
Fan, J., R.F. Marzke, E. Sanchez and C.A. Angell 1178

The Debye–Falkenhagen effect: experimental fact or fiction?
Anderson, J.E. 1190

Anharmonic and relaxation effects in polymer electrolytes with singly charged cations
Bartolotta, A., G. Di Marco, M. Lanza and G. Carini 1195

Study of the diffusion in disordered ionic conductors by Langevin molecular dynamics
Puértolas, J.A. and F. Falo 1202

The local environment for sodium cations in poly(propylene glycol) from NMR and positron annihilation studies
Stevens, J.R., S.H. Chung, P. Horoyski and K.R. Jeffrey 1207

Jump relaxation model and coupling model – a comparison
Funke, K. 1215

The dynamic structure model for ion transport in glasses
Bunde, A., M.D. Ingram and P. Maass 1222

Relaxation of charged particles in disordered systems
Dieterich, W., D. Knödler and P. Pendzig 1237

Nature of the ac conductivity of ionically conducting crystals and glasses
Nowick, A.S., B.S. Lim and A.V. Vaysleyb 1243

Glass structure and energetic environment around conducting Ag^+ ion in AgI-based fast ion conducting glasses $(AgI)_x (AgPO_3)_{1-x}$ studied by calorimetry and dielectric measurement
Nakayama, M., M. Hanaya, A. Hatate and M. Oguni 1252

NMR relaxation measurements and defect mobility studies in ionic materials
Strange, J.H. and Z.H. Xie 1262

Glassy, ceramic, and crystalline lithium aluminosilicates: charge transport and low-temperature specific heat studies
Böhmer, R., M. Lotze, P. Lunkenheimer, F. Drexler, G. Gerhard and A. Loidl 1270

Study of low-frequency excitations in disordered solids by nuclear magnetic resonance and electrical conductivity
Kanert, K., R. Küchler, J. Dieckhöfer, X. Lu, H. Jain and K.L. Ngai 1277

High-frequency structural relaxation in sodium silicates – A molecular dynamic study
Kieffer, J. 1285

Conductivity and spin lattice relaxation in disordered ionic conductors
Meyer, M., P. Maass and A. Bunde 1292

Connection between NMR relaxation and electrical conductivity from distributions of activation energies of ionic motion in some fast-ion conductors
Svare, I., F. Borsa, D.R. Torgeson and S.W. Martin 1300

Frequency dependence of conductivity in superionic conducting chalcogenide glasses
Durand, B., G. Taillades, A. Pradel, M. Ribes, J.C. Badot and N. Belhadj-Tahar 1306

Ion transport in superionic conducting glasses
Pradel, A. and M. Ribes 1315

Dielectric behaviour of Nd ions in the lead borate glass
Costa, L.C. and S.K. Mendiratta 1324

Polyethylene oxide–iron thiocyanate polymeric complexes: thermal and mechanical properties
Bartolotta, A., G. Di Marco, M. Lanza and G. Carini 1328

Importance of structure in electrical conductivity relaxation
Jain, H. and W.C. Huang 1334

Calculation of the dc conductivity activation energy of ionically conducting glasses
Elliott, S.R. 1343

Relaxations in mixed alkali metaphosphate glass
Green, P.F., D. Sidebottom and R.K. Brow 1353

Electrical relaxation in a CdF_2–LiF–AlF_3–PbF_2 glass and melt
Hasz, W.C., C.T. Moynihan and P.A. Tick 1363

Study of nuclear spin relaxation in CLAP glasses
Küchler, R., O. Kanert, M. Fricke, H. Jain and K.L. Ngai 1373

Ionic transport properties in oxide glasses derived from atomic structure
Greaves, G.N. and K.L. Ngai 1378

Analysis of ac conductivity data for $Na_2O \cdot 3SiO_2$ glass by stretched exponential and Jonscher power-law methods
Nowick, A.S. and B.S. Lim 1389

Analysis of electrical relaxation in glasses and melts with large concentrations of mobile ions
Moynihan, C.T. 1395

'Window' effect in the analysis of frequency dependence of ionic conductivity
Jain, H. and C.H. Hsieh 1408

On splitting of the conductivity contributions from the dielectric loss
Díaz Calleja, R. 1413

Low temperature universality in computer simulations of the macroscopic model for ac conduction in disordered solids
Riedel, T. and J.C. Dyre 1419
Nuclear spin relaxation in electrolyte glasses
Kanert, O., A. Hackmann, R. Küchler and K.L. Ngai 1424
Dielectric and conductivity relaxation in dry and humid solid PEO electrolytes
Kyritsis, A., P. Pissis, C. Tsonos, J. Laudat and J. Ren 1431
Low-temperature electrical conductivity of oxide glasses
Lu, X., H. Jain and O. Kanert 1436
